

French Alp, 27-31, January 2013

The aim of this workshop is to gather for the first time a very lively European community. The community plays has very high impact at international level (as illustrated for instance by numerous publications in high impact factor journals such as Nature ones, Science, Nano Letters, ACS Nano, Journal of the American Chemical Society, Angewandte Chemie, Advanced Materials, or Physical Review Letters) and comprises about 50 research groups. At stakes are fundamental and applicative prospects. The field gives a striking illustration of a fruitful synergy between those two aspects: after hardly three years of upstream research, industrial corporations like Samsung or Toshiba invested considerable budgets in graphene production from metal substrates, and plan the commercialization of graphene-based devices for 2012/2013. The production of graphene on metals, the analysis of its physical/chemical properties, and the engineering of new functionalities, involves material scientists, physicists and chemists. The collaboration and interaction between these scientists is typical of graphene research. At experimental level, the needs of these scientists include synthesis facilities and surface analysis probes. These include ultra-high vacuum equipments, CVD reactors, installations and materials for chemistry laboratories, scanning probe, optical and electron microscopies, photoemission, absorption, optical spectroscopies, cryogenic equipment, electronic transport measurement setups, etc. The workshop will include extended time for discussions, through large coffee breaks, poster sessions, social events.

Scientific committee: Johann Coraux (Institut Néel), Yuriy Dedkov (TU Dresden & SPECS GmbH), Silvano Lizzit (Sincrotrone Trieste), Thomas Michely (Uni. Köln), Alexei Preobrajenski (MAX-Lab), Raoul van Gastel (Uni. Twente)

Local organizing committee: Mair Chshiev, Gilles Renaud (CEA Grenoble), Laurent Bardotti, Jean-Michel Benoit, Patrice Mélinon, Florent Tournus (LPMCN, Lyon), Florent Calvo, Franck Rabilloud (LASIM, Lyon), Anne Bernard-Mantel, Véronique Fauvel (Institut Néel), Olivier Fruchart, Laurence Magaud, Laurent Ranno, Jean-Marc Tonnerre (Institut Néel, Grenoble)

Sponsoring options

1. Partner (max 3)

4 k€

- 6 m² booth, including tables and chairs, connection to electrical network (technical specifications to be specified to the organizers), wireless internet access,
- Color logo (high resolution electronic file to be provided when requested by the organizers) displayed on the conference website and documents for the advertisement of the event,
- An advertisement document (two A4 pages maximum, to be provided and delivered by you) inserted in the workshop bag of each participant of the workshop,
- One electronic advertisement page (to be provided by you) to be inserted in the electronic booklet which will be provided to each participant on a USB stick,
- Two free workshop passes giving access to the scientific sessions of the workshop and accommodation

2. Sponsor

2.5 k€

- Color logo (high resolution electronic file to be provided when requested by the organizers) displayed on the conference website and documents for the advertisement of the event,
- An advertisement document (two A4 pages maximum, to be provided and delivered by you) inserted in the workshop bag of each participant of the workshop,
- One free workshop pass giving access to the scientific sessions of the workshop and accommodation.

3. Advertisement document

1 k€

An advertisement document (four A4 pages maximum, to be provided and delivered by you) inserted in the workshop bag of each participant of the workshop.

4. Logo and web-link on the workshop website

1 k€

Your color logo (high resolution electronic file to be provided when requested by the organizers) displayed on the conference website, with a link pointing to the website of your company. Important web visibility will be promoted on the workshop website (www.eweg.eu) where for instance online registration will be hosted.

5. Poster price sponsoring (max 1)

4 k€

- Color logo (high resolution electronic file to be provided when requested by the organizers) displayed on the conference website and documents for the advertisement of the event,
- An advertisement document (two A4 pages maximum, to be provided and delivered by you) inserted in the workshop bag of each participant of the workshop,
- One electronic advertisement page (to be provided by you) to be inserted in the

- electronic booklet which will be provided to each participant on a USB stick,
- Two free workshop passes giving access to the scientific sessions of the workshop and accommodation.

6. Notebook for participants (max 1)

1 k€

Notebooks will be inserted in each participant's bag. About 100 participants are expected. The notebook should not exceed A4 format, and will be provided and delivered by you. Specifications regarding delivery will be given later.

7. USB sticks for electronic workshop booklet (max 1)

4 k€

The only format for the workshop booklet, including abstracts for posters, contributed and invited talks, schedule, etc, will be electronic, uploaded on a USB stick. All participants to the workshop (about 100) will be given a USB stick after registration. These USB sticks will exhibit the color logo (high resolution electronic file to be provided when requested by the organizers) of your company. The USB sticks will provide high visibility during and beyond the workshop.
