

European Workshop on Epitaxial Graphene and 2D Materials

Primošten, 15-19, June 2014

The aim of this workshop is to gather a very lively European community. The previous and first edition, EWE'2013, gathered 100 participants from all around the world, including the leading experts in the field. The community plays a very high impact (as illustrated for instance by numerous publications in high impact factor journals such as Nature ones, Science, Nano Letters, ACS Nano, Journal of the American Chemical Society, Angewandte Chemie, Advanced Materials, or Physical Review Letters) and comprises more than 60 research groups. At stake are fundamental and applicative prospects. The field gives a striking illustration of a fruitful synergy between those two aspects: after hardly three years of upstream research, industrial corporations like Samsung or Toshiba invested considerable budgets in graphene production from metal substrates, and plan the commercialization of graphene-based devices for 2013. Public finances now play a decisive role in Europe, with the launching of the 1 billion euros-winning Flagship project. The production of graphene and other 2D materials (*e.g.* transition metal dichalcogenides, boron nitride), the analysis of their physical/chemical properties, and the engineering of new functionalities, involves material scientists, physicists and chemists. The collaboration and interaction between these scientists is an obvious characteristic of this research. At experimental level, the needs of these scientists include synthesis facilities and surface analysis probes. These include ultra-high vacuum equipments, CVD reactors, installations and materials for chemistry laboratories, scanning probe, optical and electron microscopies, photoemission, absorption, optical spectroscopies, cryogenic equipment, electronic transport measurement setups, etc. The workshop will include extended time for discussions, through large coffee breaks, poster sessions, social events.

Scientific Committee

Dr. Johann Coraux	Institut Néel, Grenoble
Dr. Yuriy Dedkov	Technische Universität Dresden and SPECS GmbH
Prof. Roman Fasel	Empa, Dübendorf
Prof. Thomas Greber	Physik-Institut, Universität Zürich
Dr. Rosana Larciprete	CNR-IRC, Roma
Dr. Silvano Lizzit	Sincrotrone Trieste, Trieste
Prof. Thomas Michely	Universität zu Köln, Cologne
Dr. Alexei Preobrajenski	MAX-Laboratory, Lund
Dr. Raoul van Gastel	University of Twente, Enschede

Local organizing Committee

Dr. Hrvoje Buljan	Department of Physics, University of Zagreb
Dr. Davor Čapeta	Department of Physics, University of Zagreb
Ida Delač Marion	Institute of Physics, Zagreb
Dr. Marko Kralj	Institute of Physics, Zagreb
Dr. Predrag Lazić	Ruđer Bošković Institute, Zagreb
Marin Petrović	Institute of Physics, Zagreb
Iva Šrut	Institute of Physics, Zagreb
Dr. Tomislav Vuletić	Institute of Physics, Zagreb

Sponsoring options

1. Partner (max 3)

4 k€

- 6 m² booth, including tables and chairs, connection to electrical network (technical specifications to be specified to the organizers), wireless internet access,
- Color logo (high resolution electronic file to be provided when requested by the organizers) displayed on the workshop website and documents for the advertisement of the event,
- An advertisement document (two A4 pages maximum, to be provided and delivered by you) inserted in the workshop bag of each participant of the workshop,
- One electronic advertisement page (to be provided by you) to be inserted in the electronic booklet which will be provided to each participant on a USB stick,
- One free workshop pass giving access to the scientific sessions of the workshop and accommodation

2. Sponsor

2.5 k€

- Color logo (high resolution electronic file to be provided when requested by the organizers) displayed on the conference website and documents for the advertisement of the event,
- An advertisement document (two A4 pages maximum, to be provided and delivered by you) inserted in the workshop bag of each participant of the workshop,
- One free workshop pass giving access to the scientific sessions of the workshop and accommodation.

3. Advertisement document

1 k€

An advertisement document (four A4 pages maximum, to be provided and delivered by you) inserted in the workshop bag of each participant of the workshop.

4. Logo and web-link on the workshop website

1 k€

Your color logo (high resolution electronic file to be provided when requested by the organizers) displayed on the workshop website, with a link pointing to the website of your company. Important web visibility will be promoted on the workshop website (www.eweg.eu) where for instance online registration and abstract submission will be hosted.

5. Poster prize sponsoring (max 1)

4 k€

- Color logo (high resolution electronic file to be provided when requested by the organizers) displayed on the workshop website and documents for the advertisement of the event,

- An advertisement document (two A4 pages maximum, to be provided and delivered by you) inserted in the workshop bag of each participant of the workshop,
- One electronic advertisement page (to be provided by you) to be inserted in the electronic booklet which will be provided to each participant on a USB stick,
- One free workshop pass giving access to the scientific sessions of the workshop and accommodation.

6. Best contributed talk prize sponsoring (max 1) | 4 k€

- Color logo (high resolution electronic file to be provided when requested by the organizers) displayed on the workshop website and documents for the advertisement of the event,
- An advertisement document (two A4 pages maximum, to be provided and delivered by you) inserted in the workshop bag of each participant of the workshop,
- One electronic advertisement page (to be provided by you) to be inserted in the electronic booklet which will be provided to each participant on a USB stick,
- One free workshop pass giving access to the scientific sessions of the workshop and accommodation.

7. Notebook for participants (max 1) | 1 k€

Notebooks will be inserted in each participant's bag. About 150 participants are expected. The notebook should not exceed A4 format, and will be provided and delivered by you. Specifications regarding delivery will be given later.

8. USB sticks for electronic workshop booklet (max 1) | 4 k€

The only format for the workshop booklet, including abstracts for posters, contributed and invited talks, schedule, etc, will be electronic, uploaded on a USB stick. All participants to the workshop (about 150) will be given a USB stick after registration. These USB sticks will exhibit the color logo (high resolution electronic file to be provided when requested by the organizers) of your company. The USB sticks will provide high visibility during and beyond the workshop.
